[Portfolio Website](#)

A **responsible** and **visionary** Telecommunication Engineering graduate with expertise in **data science**, **machine learning**, and **IoT**. Experienced in leading technology projects, developing data-driven solutions, and managing organizational initiatives. Equipped with strong **leadership**, **problem-solving**, and **communication** skills honed through academic, research, and community engagements. Actively seeking opportunities to contribute to impactful technology projects and innovations.

EDUCATION

Telkom University

September 2021 – January 2025

Bachelor's degree in Telecommunication Engineering, In-Major GPA: 3.44 / 4.00

Thesis: The influence of water quality with Temperature, pH, and Turbidity parameters on catfish growth in Bandung Techno Park Pond using Machine Learning methods

EXPERIENCE

Multimedia, Big Data, and Cybersecurity Laboratory

Dec 2022 – Jan 2025

Research Assistant – Big Data Division

- Developed machine learning models for water quality analysis, leveraging Python for data preprocessing, feature engineering, and advanced predictive analytics.
- Created interactive dashboards using Tableau to visualize and communicate data-driven insights effectively.
- Participated in competitive data challenges, including JOINTS DATA COMPETITION and COMPFEST Data Analytics Dash, showcasing expertise in solving real-world business problems through data analysis.
- Collected review data on film series using web scraping techniques from IMDb and conducted sentiment analysis using NLTK to identify audience sentiment trends and patterns. *Head of Public Relations Division*

Himpunan Mahasiswa Teknik Telekomunikasi

Sep 2024 – Jan 2025

Vice President

- Supervised five departments and ensured smooth operations among 60 members.
- Facilitated collaboration between ministries and departments to drive impactful projects.

Perhimpunan Penjelajah Alam Jamadagni

Feb 2023 – Apr 2024

Head of Pendidikan Lanjutan 46

- Designed and implemented training programs for junior members, ensuring successful execution and evaluation of outcomes.

PROJECT

Innovillage 2023: "Goatguard"

Sep 2023 – Feb 2024

- Designed an IoT architecture and machine learning models to detect goat diseases early using health parameters such as temperature, heart rate, and oxygen saturation.
- Developed a real-time monitoring system to enhance livestock health management through actionable insights.

MyIpond: "A Water Quality Monitoring System for Catfish Ponds"

Sep 2024 – Dec 2024

- Created an IoT-enabled system integrated with machine learning to monitor water quality in real-time.
- Improved pond management efficiency by leveraging data-driven decision-making tools.

CERTIFICATIONS

- [Data Scientist Associate](#)
- [Belajar Machine Learning untuk Pemula \(Dicoding Academy\)](#)
- [Microsoft Excel from Beginner to Advanced \(Udemy\)](#)
- [Intro to Data Analytics \(RevoU\)](#)
- [Intermediate SQL \(Sololearn\)](#)
- [Latihan Keterampilan Manajemen Mahasiswa - Tingkat Menengah \(Kemdikbudristek\)](#)

SKILLS

Office Productivity	Microsoft Office	Advanced
Data Science	Machine Learning, Data Preprocessing, Feature Engineering, Data Cleaning	Advanced
Programming	Python, C++, C	Advanced
Internet of Things	System design, Real-time Data Monitoring	Intermediate
Data Visualization	Tableau	Intermediate

LANGUAGES

Indonesia: Native proficiency

English: Intermediate
